Why Body Up Compact

COMPACT
BodyUP[®] est 1998
and the living is easy

In **1998**, at a time when traditional cranes dominated the market, **Body Up** emerged to disrupt the norms, bringing significant improvements to the quality of life for thousands of families in more than 40 countries.

Because it is manufactured in Europe and is the only one that responsibly guarantees user safety, certified by **SWISS APPROVAL**.

Because it has limited service and spare parts requirements due to its construction, as it does not rely on electricity and batteries.

Because it is the only stainless steel and waterproof solution.

The basic unit of the **Body Up Compact**, includes:

- 1 The main seat with an integrated stabilization belt.
- 2 The waterproof bath and toilet seat.
- 3 The comfortable seat.

*This ensures that you have everything you need to make the most of all the capabilities of the **Body Up Compact**.*
